

PranaAI Weekly Wellness Report

User: test_user_pdf

1. Dosha Profile

Dominant Dosha: Vata-Pitta

Constitution Breakdown:

- Vata: High
- Pitta: Medium
- Kapha: Low

2. Clinical Reasoning & Context

The user is experiencing significant cold and dry symptoms (dry skin, cold extremities) which points to Vata. Simultaneously, they report mild acidity and heat issues, pointing to secondary Pitta. This dual presentation means both doshas require care, and the guidelines for both Vata and Pitta balancing routines and dietary adjustments must be detailed. This long explanation ensures we test the wrapping logic and page breaks of the report generator properly so it does not overlap the footer.

3. Recommended Diet & Lifestyle Guidelines

[Vata Balancing Guidelines]

Favor warm, cooked, nourishing, and slightly oily foods. Maintain a regular daily routine for sleeping, eating, and working. Focus on grounding activities like gentle yoga, meditation, and self-massage (Abhyanga) with warm sesame oil. Avoid cold, raw, dry, or light foods.

Governed by Air and Space elements. Qualities are dry, light, cold, rough, subtle, mobile, and clear. Regulates movement, nerve impulses, breathing, and elimination.

[Pitta Balancing Guidelines]

Favor cooling, hydrating, and mildly spiced foods. Keep hydrated and spend time in nature (especially near water or under the moonlight). Practice moderation in work and exercise, avoiding the midday heat. Practice cooling pranayama (like Sitali) and favor soothing self-massage with coconut oil. Avoid hot, spicy, oily, salty, or highly acidic foods.

Governed by Fire and Water elements. Qualities are oily, sharp, hot, light, spreading, and liquid. Regulates digestion, metabolism, body temperature, and understanding.
